

Public Goods Data Analyst Technical Assessment

Thank you for applying to the Data Analyst position at Public Goods!

This is the next step in the interview process - it is a simple way for us to understand a bit more about the skill set detailed in your resume.

Instructions:

Please make sure you have access to:

- SQL editor compatible with PostgreSQL

You will be tested in these skill areas:

- SQL
- Business understanding

For SQL challenges, we expect a file with executable queries and query results. As for business questions, we would like to know how you approach the question, so please document your thought process as detailed as possible.

We expect to receive 1 email with all the files, not multiple emails with different files. Please do not zip the file as you send, attach the documents individually.

Once you complete the tasks, please send the files with the completed tasks as attachments to shu@publicgoods.com. We will send you a confirmation email once we have received your exam. Thank you!

We look forward to receiving your completed tasks!

All the best,
Public Goods
